

The Great Outdoors

Volume 2

The Great Outdoors-

That's what it's all about. We don't get up early and freeze just to kill something. We don't sit still through an ambush of mosquitoes just because we might see something. We do it because of the Great Outdoors. We see things so few people get to see. Ninja squirrels that attack other squirrels and that flock of 30 turkeys that only comes out during deer season and that 14 pointer that seems to be amused by your spring turkey decoy set up. That's what it's all about. How blessed we are to see these things. How rare we must be in the world. Have you done anything lately to insure that others will see these wonderful things? Not just future generations, but what about now?

Tara

Even rabbit season is over now- bummer. Now we wait for turkey season. Some of you might be fishing now or maybe catching up on that honey-do list- you know the one you've totally neglected since last October? Or maybe you're trying to work a little now so you can afford bullets for next season! No matter what you're doing I hope you are happy and healthy!

This newsletter is meant to inform you all of what's going on and what you might have missed.

Renewals will start the beginning of April- that means you need to find your password! Keep a check on your email and please make sure the contact info on the web is correct!

I want to remind you all of a few things:

-Each club is responsible for keeping up with their login information. I feel that it is a good idea for the officers of the club to have the login info- even if they have no idea how to get online. That way if the person in charge the "internet stuff" becomes unable for whatever reason to keep doing it there is still

My Thoughts...

Nature Amazes me- I am often blown away at the beautiful things God has made for us. But I also know that He has a fantastic sense of humor and I learn this through nature- Think about it- How does 1 squirrel - that weighs what- less than 5 lbs make more noise that 4 deer coming through the woods? How can a tweety bird hop at such regular intervals that one just knows - somethin's comin'- How many times have you sat in your stand and been entertained by 'Ninja Squirrels'? or sat up and looked under you because you knew you heard a deer- only to see a cardinal? Do you laugh at yourself- I know I do. I also usually vow at least once a deer season that next year I'm gonna take up squirrel hunting. I'll teach them! I never do though- What would keep me entertained until the deer got there then?

someone else that has access to the info you need to get onto the website.

-It is each clubs responsibility to keep their information up to date. If your contact person gets a new email address- ya'll need to make sure it is changed on the website. Email addresses are going to be our **primary** mode of contact with you all- so if you want to know what's going on- keep the email address current. That goes with any other changes- please don't send me an email or call me - please change it yourself.

-This year **June 15th, 2010** will be the cut off- I want to have received your signed lease and check by June 1, 2010 but if I haven't and you have not contacted me for payment arrangements by June 15th, the RLU you have leased will go up for competitive bid. That means if you don't pay on time you will have to be the highest bidder to get it back. I have been very lenient on this in the past and I cannot continue to do so.

-This should go without saying- please respect the roads and land you are hunting on. It is no secret that money is tight so road work and repair is not on the top of the list. Please be considerate of this. If you wouldn't want me driving on your driveway and front yard like you are driving on our paths- please stop.

Check it out...

Steve Cotney-(the me in Alabama)and I have gotten together and created a blog. We want you to check it out- go to www.sehunting.blogspot.com

Become a follower and drop us a comment!

-Please keep the gates locked. There are so many reasons- and I am sure you all are aware of them so I won't say anymore.

-Dispose of the game remains properly- If you don't want it like that in your front yard- don't do it on your lease. Failure to dispose of carcasses properly can result in a littering citation from the game warden- if you don't believe me ask one.

The next page has the Classifieds on it. These will also be posted on our website- www.mdneal.com – on the hunters page. I will be taking ads with a deadline of each Wednesday at 10 AM. Items are not limited to hunting – think of it as a free Bargain Trader- just no Michael Jackson albums for \$2000.00!

The items for sale are not endorsed by M.D. Neal & Assoc., Inc. and terms and agreements are between buyer and seller. Email me at hunt@mdneal.com or fax your item to 252-398-1480 to have it posted here. I need the item description and how you want to be contacted. Items listed will be posted on mdneal.com on Hunters page and updated weekly. Items will be posted for a month unless otherwise specified/requested. This newsletter only comes out on the odd number months- so the most up to date postings will be on www.mdneal.com on the Hunters page.
